Subject: RE: Hydro support for Upper Animas

Andrew – That is great. I just hope we can get Ian to the field to oversee the PRP's upcoming field sampling at the Mayflower Mill & Tailings. It was a bit too quick to expect that we could get Ian in the field to oversee the PRP's drilling this week – since the "light bulb" as to Ian's availability only came on last Friday and he is still getting his H/S "credentials" in order as a new employee. In addition, we hadn't known when the PRP was actually going to begin their activities.

But Ian's assistance with the hydro issues at the Upper Animas will be most welcome given its high priority in the Program and with the ARA. Thanks for your help on this.

Subject: Hydro support for Upper Animas

Paula and Liz,

I know that you guys recently utilized Ian for a quick turn review of some impending Upper Animas work. In addition, it sounds like you were interested in having Ian oversee some upcoming field work. Ian, Sarah and I have talked about work distribution and Ian can take on the full hydro support role for the project.

Thanks!

Andrew
